

LargoTint 2000

Recipe management and dispensing software

The LargoTint 2000 software is designed to handle recipes/formulas at the point-of-sale. The system has functions for formula management, dispensing, label printing, colour measurement etc. in a user-friendly environment.

Today the use of automatic dispensing machines is growing. The merges between companies spread in different part of the world, creates a demand for easy updates of standard recipes and control of what has been dispensed.

Within a company group often different types of dispensers from several suppliers are used, a mixture of automatic, semi-automatic and manual. This situation creates time consuming routines for updating standard recipes, installations etc which will be solved by using LargoTint 2000.

The screen can be customized with your own brands, product logos, cans, fan decks to market your company even more..

LargoTint 2000 can be set to retrieve statistic over tinted colours, usage of colorants etc via e-mail, internet or disc, which will give the paint manufacturer an overview of trends of colour choices. The system can locally be configured to receive updates of recipes automatically via e-mail, ftp or manually via disc and run up to 4 different dispensers parallel from the same software.

In large company groups active in several markets the language may be a problem. The LargoTint 2000 supports today 23 languages such as English, German, French, Spanish, Italian, Russian, Chinese, Greek, Swedish, Danish, Finnish, Norwegian, Polish, Dutch etc you just chose in set up which shall be used in menus on screen.

How does it work?

When installing a licence you will get two programs, LargoTint 2000 and LT Setup for configuration.

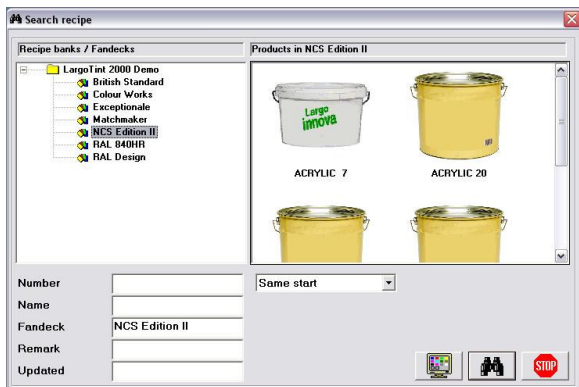

The LargoTint 2000 is for the daily use with drop-down menu for each working area Dispense, Recipe, Dispenser, Help and Maintenance. For easy access the toolbar have short cuts for most common used functions.

Search recipe

To search among your recipes in a flash will save time. The search screen has three sections with a recipe bank/collection table, product selection and input of recipe search criterion.

The Product selection can be shown as a list or by brands showing your own product pictures.

If you want to see all available shades use the LargoView and the screen will be filled with colour samples. If you prefer a list, chose the "binocular and pick preferred recipe.

Choices made in Setup will give access to different features which may be shown as small icons on recipe screen. From here you can adjust the recipe too before dispensing.

Features

Among the functions available from the drop-down menu you can create new, edit existing, delete and save recipe among your own. You can very fast handle price changes, statistics, recipe updates, labels etc.

Depending on what kind of dispenser you run there are different features for maintenance available e.g. fill colorant, clean nozzles, start agitation etc. You easily dispense your recipe in chosen can size one by one or in multiple. By the Manual dispense you may enter a recipe and get it tinted as well.

In the LT Setup you configure your tinting systems with kind of dispenser, colorants, recipes, connect product leaflets, create price groups, labels, activate statistics, update service, bar code readers and so on.

The built-in Help file will bring you to the right section when needed explaining what to do, just press F1-key.

Options

For even more features at the shop or retailer, it is possible to add on software tools:
